Thrills Galore at Arena Last Night

Coleman Made Dashing Attempt
to Beat Old Rival—Failed to
Find Net After Opening the
Score—Velpeva and Manson
Exchanged Blows.

Most Exciting Game of Crow
League This Season and Fans
Were Kept on Their Toes.

Blairmore maintained leadership in the "Crow" league by winning against Coleman in the arena here last evening by a score of 5-1. Coleman opening the score after eight minutes of fast play in the first period, when Frank Velpeva shot into Blairmore goal a hot one that Kemp didn't see.

In the second period Tony Velpeva scored once and McKay twice for Blairmore, and in the third, which was marked by rough play, Tony Velpeva again scored twice, Coleman being shut out after the first period.

Despite their matches against Trail on Monday and Tuesday at Blairmore, the visitors showed plenty of pep. Coleman made a determined effort to beat their old rivals, and Gate, Velpeva and Jenkins did splendid work. Cologrosso, Coleman's goalie, made some remarkable saves in the first period, giving local supporters hopes of beating Blairmore.

In the third period Manson of Blairmore and Frank Velpeva of Coleman started to fight, and were ruled off for ten minutes each.

The crowd enjoyed plenty of thrills throughout the game and were kept on their toes by the fast pace of both sides. Coleman played well in attack and Gate and Velpeva were splendid on defense, but Blairmore's skill around the goal and the combination of their forward line was up to the usual mark.

Jenkins and Lilya, two of the younger players on Coleman team, put up a splendid exhibition, and gave Blairmore plenty of work. Jim Fraser was in good form at centre, and Martini and Kubin as subs gave a good account of themselves. Though getting the small end of the score, the locals earned plenty of praise for the spirited fight they put up to hold second place in the league.

Lethbridge now holds second place, defeating Bellevue at the latter town last night by a score of 4-2.

The line up.

Coleman—Cologrosso, goal; F. Velpeva, Gate, defence; Lilya, Fraser, Jenkins, forwards; Martini, Kubin, subs.

Blairmore—Kemp, goal; Manson, Evans, defence; J. Kemp, Oakes, McKay, forwards; McKey, Dicken, Tony Velpeva, subs.

Penalties—First period, Zone; second, Velpeva and Lilya, Coleman; Manson and McKey, Blairmore; third, Velpeva of Coleman and Manson of Blairmore, 10 minutes each.

Referee, Alex, Cornett, Coleman. Attendance 250.

Fined at Bellevue

For violation of the Mines Act by riding on a locomotive without the permission of the manager of the mine, Edward Edowski and Paul Belish, of Bellevue, were each fined \$15, with costs, or 30 days, by Magistrate Gresham at Blairmore.—Lethbridge Herald.

Miss Hilda Fairhurst, R. N., of the Nursing Mission, Lethbridge, paid a short visit to the home of her parents over the week end.

Balance on hand	\$24.00

The balance will be used for relief during the winter. Anyone needing relief should notify Captain Fowler.

Captain Fowler wishes to express his thanks to those who donated to the needy dinner cause, and to those who willingly gave of their time to assist at the dinner.

An Old Pal in the Headlines

The prize pipe dream of the week's news was the story of Jimmy Parkinson at Estevan, Sask., being worth \$4,000,000, in coal. Jimmy and the editor of this paper know each other well, as we had Christmas dinner together in 1918, the third male member of the party being the "Iron Duke," another returned soldier of rare and ancient vintage.

Now that Jimmy has "made the headlines," we recall that he dug the ditch and laid the water-pipes into our humble little cottage, and that he would sing most heartily when occasion required—Come, come, come and have a "glaw's wi' me, Down at the 'Bull and Bush'!"

We don't know whose tongue was stuck the furthest in his cheek when the story appeared in coast-to-coast dailies—Jimmy's, the reporter's or "us," but it was certainly a "corking good story," especially so when you know Jimmy.

Practical Christianity

An example of good will was recently shown by the people of Cobbin who through their Christmas Tree committee volunteered to make donations for relief in the Pass towns. Their kind offer was greatly appreciated by the relief committees in the various towns.

The United church in Coleman also donated 26 sweaters and 28 pairs of stockings. These were distributed among eleven families in which there were 68 children, by Dave Gillespie, secretary of the local union.

Walter Tomlins of Brocket spent the week-end with the Olson family.

The annual meeting of St. Albans congregation will be held on Monday evening next at 8 p.m., when the financial statement and annual report of the church organizations will be submitted.

Acid Stomach

Acid stomach is the common cause of times. Its volume is acid. It is burning and distressing. It results in pain and distress and taints the food. Its action is quick. You will never rely on crude methods; you will continue to suffer, unless you learn to control quickly, how easily this popular method acts. Please let it show you now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians and dentists. It corrects excess acids. Each bottle contains full measures.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many directions—any drugstore.

Reduce Armies As Well As Navies

The outstanding event of this opening month of the new year is the assembling of the naval reduction conference in London, England, upon invitation of the British Government to the other Great Powers, to devise ways and means of securing a substantial lessening of the burden borne by all in maintaining huge navies, while at the same time, they are mutually pledged the one to the other and to all not to resort to war. The conference opens with every prospect of success attending its deliberations, and particularly so in view of the fine understanding already reached between Great Britain and the United States. The hopes and desires of all mankind are wrapped up in its success.

If an accord can be reached in regard to questions of naval strength the next step should, and undoubtedly will be, an endeavor to arrive at an agreement for the reduction of armies and other forms of land armament. Military preparedness, so called, as distinct from naval establishments, imposes on even heavier burden on most nations. Nevertheless, the question of the size of armies seems to present the more difficult problem.

For example, here in Canada we can understand why the United States with the Atlantic, and Pacific, and Gulf of Mexico bounding it on three sides, with its island possessions of the Philippines, Porto Rico, etc., and its ocean borne trade, should feel the necessity of a strong navy, but the majority of our people are at a loss to understand the need of a large standing army and an extensive National Guard or militia.

Following, as it did, the cordial reception tendered Premier Ramsay MacDonald by President Hoover, and the spontaneous acceptance of the invitation to the naval conference in London, Mr. Hoover's Armistice Day speech came as something of a shock in that he laid stress, —many people believe too much stress,—on the old gospel of preparedness and particularly as it applied to the United States. Nor is this feeling allayed in President Hoover's first budget message to Congress, wherein he asks for increased appropriations for the army.

President Hoover's statement that sufficient forces must be maintained to prevent "the foot of the invader landing on our sacred soil," sounded like a sop to the militarists. There does not appear to be the vaguest possibility that any power or combination of powers contemplates any such fantastic step or that it is ever likely to happen. Canada and Mexico are the only two countries whose territory is contiguous to the United States, and this Dominion's permanent force of approximately 3,000 does not constitute a threat, nor has the U.S. anything to fear from Mexico. Why, then, such huge army expenditures?

President Hoover has taken a fine stand on naval reductions and also on the Kellogg anti-war pact, but if real progress is to be made towards disarmament an even greater measure of enthusiasm must be displayed for reduction in land forces. In his address he referred to the fact that there are ten million men under arms in Europe, vastly more than in 1914. But, instead of attempting to formulate some plan whereby a reduction in these immense forces could be effected, Mr. Hoover seemed chiefly concerned in having the United States build up a bigger army to avoid invasion by these overseas millions.

Real friends of peace would have liked to hear President Hoover issue an urgent call to European countries to immediately start cutting down their armies, and, instead of advocating a still larger army for his country, he could safely add weight to his plea by favoring a reduction, rather than an increase, in the United States land forces. The war-weary peoples in all countries would have welcomed such a lead from the United States.

Apparently the lesson that preparedness for war inevitably leads to war has not yet been sufficiently impressed upon the minds of the people. An enormous percentage of the four billions of dollars which Mr. Hoover asks Congress to provide in its next budget, is to cover the costs of former wars and to "prepare" for possible future ones. In 1928 the United States spent sixty cents out of every dollar on account of war financing. Another twenty cents were spent by the army and navy, making a total of eighty cents out of every dollar collected in general taxes for military—and, in an economic sense, unproductive—purposes.

In that same year in Canada, a pacific nation, spending far less than other countries on war preparation and debts incurred by war, heavy as the latter are, 45¢ cents out of every dollar expended by the Government was attributable to war.

In the light of these figures it is clearly evident that, if this damnable doctrine of "preparedness" is to be allowed to continue as the basis of international relations, all the efforts of the League of Nations, all Peace Pacts, all efforts of peace organizations will fail. The people must bestir themselves in order to avert the possibility of future wars.

An Extensive Collection

Man Surprised At Number Of Edgar Wallace's Books

A man recently went into an English library and asked for the complete works of Edgar Wallace. "The result," he said, "was extraordinary. A whole squadron of men marched into the reading-room with long steel rods over their shoulders. Clamped to these rods were rows of Edgar Wallace's books, in wood. They reminded me of the long poles which vegetable-sellers carry, with onions slung on them." He said that there must have been in all something like 200 books,

including some very early Edgar Wallace poems, in the Mafsed manner, now completely forgotten.

Good Season For Furs

First Returns From Trappers In Northern Manitoba Are Favorable

A good fur season in northern Manitoba is indicated by first returns from the trappers. Dr. H. H. Elliott, commissioner for northern Manitoba, announces. During the past few years, the fur catch has been steadily decreasing, but this year a new cycle of successful trapping seems to have started.

The commissioner stated that the new regulations governing fur trade in the province seems to be proving satisfactory.

The number of trappers now working in the north has shown a substantial increase over the 1928 figure, Dr. Elliott asserted.

"John, you have been drinking my brandy."

"I have not sir."

"Are you quite sure?"

"Quite sure. I could not get the cork out."

Looking To the Future

New York Skyscrapers To Have Mast For Dirigibles

Alfred E. Smith, skyscraper builder, has announced that the 1,100 foot tower of the Empire State building will be surmounted by a 200 foot mooring mast for Zeppelin airships through which passengers can descend in seven minutes to the street, instead of landing at Lakehurst, 70 miles away.

Mr. Smith will go to Washington to ask Secretary of the Navy Adams for the help of navy engineers in designing a mast for dirigible airships in mooring mast construction.

Already, Shreve, Lamb and Harmon, architects of the 85-story building, have consulted the engineers of the Goodyear Zeppelin Company, which contemplated transportation lines with the two great airships it is building.

The directors of Empire State, Inc., president, come to the conclusion that there would be a trans-Atlantic, trans-Pacific and transcontinental airship lines, and possibly a line to South America.

Thousands of Mothers Use No Other Medicine

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are won over for the tablets they give their little ones—the health of the baby is most jealousy guarded and the mother is always on the lookout for a remedy which is effective and at the same time safe.

Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else. Among them is Mrs. Horace King, of Truro, N.S., who says—"I strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by mail-order, or by mail, at 25 cents a box, from The Williams Medicine Co., Brockville, Ont.

Fish Fry Transported To Stock Western Waters

Over Five Million Fish Fry Deposited In Western Waters During Past Year

There should be a lot of new sport fishing in western Canada waters in a few years. A report by the Canadian National Railways shows that during the current year that company transported 5,352,000 fish fry or eggs for deposit in various waters in Western Canada. Pickerel and the following varieties of fish were included in the shipments: Loch Leven, speckled, brown, salmon, rainbow and Kamloops. The pickerel were all placed in prairie waters and the trout in mountain and foothills waters.

Miller's Worm Powders will drive worms from a system w' th ease. Injury to the child is so slight and easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, and the wormer will relieve the worms that cause the pain, and thus the suffering of the child is relieved. With no stinging a remedy at hand no child should suffer an hour from worms.

Miller's Worm Powders will drive worms from a system w' th ease.

Injury to the child is so slight and easy to take that the most delicate

stomach can assimilate them and welcome them as speedy easers of pain,

and the wormer will relieve the worms that cause the pain, and thus the suffering of the child is relieved.

With no stinging a remedy at hand no child should suffer an hour from worms.

Hotel Cecil Is Sold

Famous London Hostelry Purchased By Oil and Gasoline Corporation

The Hotel Cecil, one of the most

famous landmarks between the

Strand and the Thames for the last 30 years, and patronized especially by overseas visitors, has been sold to serve as headquarters for a great oil and gasoline corporation. The purchase price was about \$7,500,000.

The Hotel Cecil's disappearance is another proof of the tendency of all enterprises catering largely for visitors, both in amusement and accommodation, to move further westward in the city. The hotel possesses 900 bedrooms, and eleven banqueting halls, being the creation of a notorious firm, Jabez Balfour, who was brought back from refuge in the Argentine to suffer long imprisonment.

The hotel was originally built at the time of Balfour's crash. During the war it was the headquarters of the Royal Air Force.

The creation of travelling scholarships would be the finest method to bring this about, he believed, and as the initial step he suggested a scholarship at the British school in Rome.

In seeking to fulfil their ambition for a type of architecture distinctly Canadian, those of the profession were at present toying with modernity and interesting themselves less with the several traditions so actively competitive in pre-war days, the lecturer declared.

Cramped His Style

Old Mose Parker was pretty sick, and the darky doctor promptly put him to bed and laid down all sorts of rules and regulations as to sleep and diet. After he had gone, Mose turned to his wife and complained:

"Mandy, how does dat dere fool doctor reckon Ah's gwine to eat breast ob chicken ebry day if Ah ain't got ma ebabin's free?"

The population of the earth is said to double itself every 250 years.

Nearly 4,000 tons of liles were used

in China, this year, to make soap.

Interesting Riel Letters

Valuable Historical Documents Are Received By Dominion Archivist

Collectors of historical Canadian documents would probably give considerable for those that have recently come into possession of Dr. A. G. Doughty, Dominion Archivist, consisting of letters to and from "President Louis Riel, of the North West Territories," written in March, 1870, at the time of the Riel Rebellion.

These documents include interesting copies of acts passed by the first session of the first legislature of Rupert's Land, of which Louis Riel was president, one of them being an act to establish a military force. This was to consist of 50 men to be stationed at Fort Garry, and the monthly wages were set at \$15 and board.

There are many interesting documents in the collection Dr. Doughty obtained from York, England, from relatives of a British soldier who apparently seized the letters at the Riel home and elsewhere during the rebellion.

"I was very fortunate in obtaining this collection of old letters and copies of acts, and it is a striking example of how old and historic documents wander abroad, and come to light in unexpected places," he said. Riel's proclamation prior to the rebellion, under the caption of "The List of Rights," set forth the reasons for the upheaval which came to be known in later years as the North West Rebellion. A copy of this important document, also the first act passed by the North West Territories legislature, with the letters in question, old and faded, but still decipherable and written in French or English, now resides in the Dominion Archives, pasted into a book. They are considered exceedingly valuable by Dr. Doughty.

He was also provided for Travelling musicians to play his instrument in unison he has prepared a scale of colored lights to ensure even tone. He maintains that either wave music is easier to master than any other musical medium.

Complete Broadcasting Circuit

Canadian National Forges Last Link In Coast To Coast Radio Chain

By the completion of a broadcasting circuit from Edmonton to Vancouver, the Canadian National Railways have forged the last link in a coast-to-coast chain of radio stations. Announcement of the installation of the new circuit was made recently by the telegraph department of the system. The first broadcast to go over the new section took place on Thursday, December 19, when the Hart House Studio, Queen's University, became the microphone at Toronto. Up to the present, the Rockies have been a barrier against consistently good reception of eastern radio broadcasts, but now Pacific coast listeners will be able to hear the best concerts of the other centres of Canada. Contact between all parts of the Dominion may now be maintained by the medium of instantaneous transmission of speech. The vast radio network is an engineering feat which keeps pace with the progress of both Canada and the National system. The radio department will broadcast three hours weekly over the Atlantic-Pacific network and plans are underway for several commercial programmes to reach the coast.

Pocket Screen Stops Noise

Russian Invention Boon To People Who Like Quietness

A pocket screen to shut out noise is the invention of Leon Theremin, a Russian inventor. With the invention in his pocket, the peace loving man could ride about through the busiest streets and yet enjoy the profound silence of a cathedral.

The "Russian Edison" has found that the principle of the other-wave music instrument can be applied successfully in numerous other fields. He prophesies that adaptions of the electro-magnetic field will be of great significance in industry as well as in musical circles.

He also has provided for Travelling musicians to play his instrument in unison he has prepared a scale of colored lights to ensure even tone. He maintains that either wave music is easier to master than any other musical medium.

Homes Of Steel

Steel houses, complete in every detail and including a bathroom, electric lights and central heating, are being planned for Paris. The houses can be constructed in eight minutes and can be erected on their sites in a few hours.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Some people are hard to please. They are always looking for trouble and are not satisfied when they find it.

A golf club has been invented which whistles when a drive is made correctly.

Minard's for the Ideal Rubdown.

New-born Negro infants are usually reddish chocolate or copper in color.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless.

The ever-growing reputation of Dr. Minard's Asthma Remedy has given it a wide popularity. It is the only medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Exports of ostrich feathers from South Africa in past years have amounted to \$15,000,000 annually.

ZAM-BUK Beats Any Embrocation In Winter Aches & Pains

Try a Box To-Day!

Whilst Zam-Buk has long been recognised as Canada's most popular remedy in skin troubles, how many know how better it is than any pain-removing liniment for relieving the sharp twinges of rheumatism.

Zam-Buk is equally good for aching backs, stiff joints, sore muscles, cold in the head and chest, and sore throat. Rubbed well into the affected parts, Zam-Buk penetrates the aching essences soak right into the tissues, banishing sorrows, congestion and inflammation. Once applied, Zam-Buk holds the pain of both hands and then inhalts the evaporating medicinal balsams. This does the same good in another way.

Also For COLD-SORES
'CHAPS' CHILBLAINS &c.

Diet Business Is Serious

So Many Theories As To What a Person Should Eat

Something has got to be done about this dieting business. Time was when a fellow could sit down to a meal and think he knew what it was going to do to him. Now there are so many theories as to what it will do to him that he can hardly muster courage to do anything but drink. No matter what item on the menu he selects, he knows that somewhere there is a diet expert who believes it will sleepless nights, abstinence, induce tears, general depression. His head swims as he thinks of the theories which have been earnestly laid before him by various friends, each theory postively based on the authoritative word of Doctor So-and-so, a very big man, or Doctor Such-and-Such, positively one of the biggest men in the country.—Harper's Magazine.

Sale Of Farm Seeds

Disposal Of Pedigreed Seeds Is Saskatchewan Increasing Rapidly

A business that is expanding rapidly in Saskatchewan is the sale of farm seeds. J. H. Speers estimates that the sales of pedigree seed in the city has increased at least fourfold in the last five years. And there is still room for further expansion. "Five years ago," says Mr. Speers, "about 10 per cent. of the farmers knew what pedigree seed was, and how it was procured. Now perhaps 50 per cent. have that information."

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless.

The ever-growing reputation of Dr. Minard's Asthma Remedy has given it a wide popularity. It is the only medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

RADIO QUESTION TO BE REFERRED TO COMMITTEE

Ottawa.—The question of nationalizing radio broadcast in Canada will probably be referred to a parliamentary committee during the forthcoming session. While no definite announcement has come from government sources the importance of the matter has led to the conclusion that the whole subject of radio will come under review by a special committee of the House of Commons.

The chief recommendation of the Royal Commission on radio broadcasting which concluded its labors last September, was that broadcasting should be placed on a basis of public service and that stations should be owned and operated by one national company.

The recommendations included the erection of high power stations to give good reception both day and night throughout the entire settled areas of the country. The suggested nucleus of such a system is seven 50,000 watt stations. Radio engineers agree this would give Canada the most powerful chain of stations in the world.

Showered With Greetings

Prime Minister Receives Christmas Cards By the Sacchetti

Ottawa.—How many Christmas cards did you get this year? Premier Mackenzie King did a very well. He received several hundred. The exact number has not been revealed, but Christmas cards have of late been buried in a historic Laurier House by the sacchetti.

Merkely to read the kind messages from his friends and well-wishers in all parts of the world is keeping the prime minister exceedingly busy. It is a labor of love, however. Mr. King is fond of Christmas cards. Among the greetings which the prime minister has received is a very kind, personal message from Their Majesties the King and Queen.

Sea Musical Festival

Interesting Event To Be Held At Cards By the Sacchetti

Victoria.—The second annual sea musical festival will be held at the Empress Hotel, Victoria, January 15-18. Handicrafts of the Pacific Coast will be shown, music lovers will be delighted with the Sea Music of All Nations, chanteys of the Old Sailing Ship Days, Sailor Hornpipes and Fisher-Folk Dances.

The second annual mid-winter Golf Tournament will be held at the Calwood Golf and Country Club, Victoria, from February 17 to 22. Free booklets describing these events may be had upon application to the manager of the Empress Hotel, Victoria, B.C.

Boy Killed By Coastguards

Was Crossing Niagara River and Failed To Answer Command To Stop

Buffalo, N.Y.—Shot by coastguards while cruising in a small boat at the foot of Genesee street, this city, Eugene Downey, 27, son of Police Lieutenant Eugene F. Downey, died in a hospital less than an hour later. Downey was speeding across the Niagara River in a motor craft, and, according to authorities, failed to stop in answer to a command from the coastguardsmen who opened fire with a machine gun. A bullet struck Downey in the abdomen. No liquor or narcotics was found in the boat.

Student and Pilot Crashed

Springfield, Mo.—The struggle of a student pilot and his instructor for the control of an airplane, was blamed for the death of both. Samuel Bartel, thirty-five, who was an army pilot during the world war, and E. D. Allen, of Mountaineer Grove, Mo., were fatally injured when the dual-control biplane, they were flying, fell near Accaboo, Mo.

To Aid Unemployed

Edmonton, Alberta.—Provincial and civic authorities will co-operate to provide work for unmarried jobless men in Edmonton, with the province bearing the expense. It has been announced following a conference between Premier J. E. Brownlee and Mayor J. M. Douglas.

Accidental Shooting

Edmonton.—Accidentally shot in the face by a 22 rifle in the hands of his 13-year-old brother, James Pusher, 17, resident of the Camrose District, is now in hospital with a fair chance of recovery.

Date Announced For Freight Rate Hearing

Appeal Of Western Provinces To Be Considered, January 18

Ottawa.—The cabinet has announced that the freight rate appeal of the western provinces will be heard on January 18. The hearing was to have been held several weeks ago but was adjourned.

The appellant provinces are British Columbia, Alberta and Saskatchewan. Originally these provinces had agreed upon their case, which included the removal of the mountain differential and a revision of the western grain rates. Now, however, Saskatchewan has withdrawn from the other two provinces and has submitted a separate appeal. This appeal has not, as yet, been made public and it is presumed here that it will be released for publication at Regina.

Chinese Foreign Policy

Would Abolish Foreign Navigation Rights Along Coasts and Inland Waters

Nanking, China.—Foreign Minister C. T. Wang, outlining the foreign policy of the national government for 1930, has declared that the work of his ministry during the coming year would be devoted to the abolition of foreign navigation rights along the coasts and inland waters of China.

In addition, Mr. Wang hoped to secure the withdrawal of foreign troops on Chinese soil and the retrocession to China of foreign concessions and settlements.

He added that on Great Britain's initiative preparations were being made for revising the Sino-British treaties, forwarded to London.

Speech To Be Broadcast

All May Hear King George's Address At Naval Conference

London, England.—Plans are being made to broadcast the King's speech at the opening of a naval conference between 11 a.m. and 1 p.m. on Jan. 22 from the House of Lords. Immediately after his address the King will surrender the chairmanship of the conference to prime minister MacDonald.

The entire two hours of the broadcast will which will be between 6 a.m. and 8 a.m. (Eastern Standard Time), will not be occupied by the King as this time was allotted in the hope of including the introductory speeches of delegates from other countries.

Suspects Are Arrested

Eighty Natives Apprehended In Connection With Bombing Outrage In India

Lahore, India.—Eighty natives were arrested in connection with the bombing of Lord Irwin's train at Delhi.

Three of the men arrested were taken into custody at the same delegates to the National Congress.

A force of 500 former solders and civilians has been recruited and ordered to patrol the entire European quarter to guard against the possibility of native outbreaks during the anticipated heated controversy at the Congress.

To Repair Cables

May Take Two Years For French Cable Company To Repair Breaks

Paris.—Two years may be required to repair fully the damage caused to the three French cable company broken by submarine earthquakes off Newfoundland, November 18.

The three cables were apparently broken in several places. Engineers on the cable repair ship estimated that 150 miles of new cable would have to be laid to replace the torn and twisted sections. The cost probably will be about \$400,000.

Little Demand For Raw Silk

Tokyo, Japan.—As a result of the increasing manufacture of rayon and various other silk substitutes, the consumption of raw silk in Canada and the United States, is considerably less than formerly, according to reports submitted to the Silk Association. Consumption of raw silk in the United States alone during the month of September showed a drop of 6,430 bales from the month previous.

May Be President Of Club

London, England.—The report persists that the Prince of Wales, will, early in the New Year, become president of the Bachelors' Club, of which he is already a member. Should he accept, it would obviously confirm his reported intention of not entering the blessed state of matrimony in the immediate future.

Christmas Ship Disaster

Twenty-Four Lives Lost Off Coast Of Spain

London, England.—A ship disaster in which 24 lives were lost marked a Christmas Day of tempests along the coast of the British Isles, France and Spain.

A Norwegian steamship, bearing codfish from Iceland, sank off Bayona, northwestern Spain, after terrific gales forced it aground. The ship was bound for Vigo, nearby.

At 1 a.m. fisherman on shore saw its first rocket of distress. Although a heavy fog prevailed, and the storm was so severe that fishing smacks in the harbor were damaged, the fishermen struggled to reach the battered vessel. After two hours they approached within 700 yards of the doomed steamer, but could not get closer.

The stricken vessel sank with all hands. Later four bodies were washed ashore, all wearing life-preservers marked "Alasand." Letters and other documents cast up by the waves indicated the ship carried a crew of 24. No survivors were found.

Lloyd's which received an account of the shipwreck, believed the ship's name to be "Alasand" instead of "Alasang." The "Alasang" was listed as of 990 tons.

The storm blew out of the southwest, bringing the black skies and sunniness weather of Southern England. Rain fell in torrents and half railed on the streets of the White House, while wild weather ruled the south coast districts, where Christmas visitors to resort towns watched great seas pound on the beaches and harbor walls at Folkestone and other ports.

In addition, Mr. Wang hoped to secure the withdrawal of foreign troops on Chinese soil and the retrocession to China of foreign concessions and settlements.

He added that on Great Britain's initiative preparations were being made for revising the Sino-British treaties, forwarded to London.

Search For Missing Aviators

Canadian Pilots Arrive In Alaska On Way To Siberia

Seward, Alaska.—Carrying three Fairchild planes and a complement of Canadian flyers who are to engage in the search for Pilot Carl Ben Eielson and Mechanic Earl Orland, missing since early November, in Siberia, the coast guard cutter "Chelan" has arrived here.

It fought its way through heavy weather all the way north. The Canadian flyers aboard were Captain H. A. Oakes, in charge, Captain T. M. "Pat" Reid, chief pilot; B. W. Broach and Gifford Brewster, C. F. Mews and William Hughes, mechanics; Major H. C. Deckard, in charge of the expedition for the aviation corporation, and A. L. Baker, A. Pratt and Whitney, mechanics.

It fought its way through heavy weather all the way north. The Canadian flyers aboard were Captain H. A. Oakes, in charge, Captain T. M. "Pat" Reid, chief pilot; B. W. Broach and Gifford Brewster, C. F. Mews and William Hughes, mechanics; Major H. C. Deckard, in charge of the expedition for the aviation corporation, and A. L. Baker, A. Pratt and Whitney, mechanics.

The loss is estimated at \$100,000.

He made a tour of inspection and afterwards announced that the wing would be rebuilt.

Everything in the west wing save documents and papers in steel filing bookcases and filing cabinets was damaged by smoke and water. The

loss is estimated at \$100,000.

Arrest Italian Extremists

Is Alleged To Have Plotted Death Of Royalty

Brussels, Belgium.—With the arrest of a young Italian in connection with an alleged murderous plot against the Belgian royal family, police expressed the belief that they had caught the leader of an extensive group of extremists whose activities have been under surveillance some time.

Camille Berneri, alias Rosin, was arrested a few days ago after Belgian and French secret agents shadowed him for several weeks. A man named Pascale Eustache, also alleged to be one of his accomplices, was arrested simultaneously; but four other suspects, three Italian and one Dutch anarchist are still at large.

Berneri is alleged to have headed

a plot to bomb the Belgian royal train and thus to prevent the forthcoming marriage of Princess Marie Jose, of Belgium and Crown Prince Humbert of Italy.

The authorities said that an extensive roundup of anarchist and other extremists probably would result from the evidence discovered with the arrests.

Will Publish Memoirs

New York.—The memoirs of the late Georges Clemenceau, wartime premier of France, will be published simultaneously in the United States, England and France, late in February or early in March.

A UNIQUE SCHOOL ROOM

Red Cross Crippled Children's Hospital At Edmonton

Edmonton, Alberta.—The Red Cross Crippled Children's Hospital at Edmonton. All the children are bed cases, but continue their studies during the (sometimes very lengthy) time they are in hospital. In fine weather the beds are moved outside and work goes on in the fresh air and sunshine.

AWARDED FELLOWSHIP

Will Help Canadian Business

Two-Cent Letter Rate Extended To South America

Ottawa.—Christmas Day marked the inauguration of a two-cent letter rate from Canada to all parts of South America. Announcement to this effect was made by Hon. Peter J. Veniot, postmaster-general.

This letter rate already applies to all parts of North and Central America; and will now apply to the following countries: Argentine Republic, Bolivia, Brazil, Chile, Colombia, Ecuador, the Guianas, Paraguay, Peru and Venezuela.

In making the announcement, Mr. Veniot expressed the opinion that the two-cent letter rate would result in considerable advantage to Canada's business. On this point the postmaster-general commented on the great natural resources of South America, its present day development in transportation and its great trade expansion.

The South American countries, Mr. Veniot intimated, have been invited to reduce their letter rate to Canada and thus make the arrangement reciprocal.

In addition, the postmaster-general declared an agreement has been reached with the Argentine postal administration for the extension of the parcel post weight limit between Canada and Argentina from 15 pounds to 20 pounds. Such an arrangement, Mr. Veniot believed would facilitate trade with Argentina, as Canadian commercial houses would be able to ship in large quantities at lower rates than has hitherto been possible.

Fire In White House

Executive Offices Of President Hoover Damaged By Blaze

Washington.—Swept by a sudden furious Christmas Eve fire, President Hoover's executive offices at the White House were ice-coated and desolate.

Summoned from the dinner table, Mr. Hoover was one of the first to reach the west wing of the White House after the alarm was sounded. Not heeding the smoke which had begun to eddy thickly, he went into his office and began to carry out furnishings and papers. He was persuaded to leave the room with difficulty, and even then he stood outside and aided others who were carrying out valuables. The flames, however, began to show amid the smoke, and he retired to a nearby terrace to watch until the fire was brought under control shortly after 10 o'clock.

He made a tour of inspection and afterwards announced that the wing would be rebuilt.

Everything in the west wing save documents and papers in steel filing bookcases and filing cabinets was damaged by smoke and water. The loss is estimated at \$100,000.

Trying To Locate Gold

Christmas Turkey Starts Gold Rush At Sault Ste. Marie

Sault Ste. Marie, Ont.—A gold rush has started on St. Joe's Island and a dressed turkey spread the tip. It all started when a prominent merchant donated a number of turkeys for Christmas to deserving families.

Mrs. J. B. Hammond, who dressed a turkey presented by the merchant, found in its crop a gold nugget valued at \$2.50. The turkey was one of a shipment from St. Joe's Island, and local prospectors are busy trying to find out just which farm this particular bird came from.

Brought Patients From North

"Punch" Dickens Again Aids Medical Attention

Edmonton, Alberta.—C. E. "Punch" Dickens, Western Canada Airways pilot, has brought his plane to Edmonton from McMurray on another "errand of mercy." His passengers, northland residents in need of medical aid, were Dick Dawson, mining engineer, who had suffered from an appendicitis attack; L. H. Forrest, a mine employee, who recently sustained a serious eye injury in an accident, and Fred Jones, who had his hand crushed while working on a drill.

The authorities said that an extensive roundup of anarchist and other extremists probably would result from the evidence discovered with the arrests.

Criticism Is Hurlled Against U. S. Dry Board

Washington—Three more dry members of the senate have spoken

their minds concerning present prohibition enforcement conditions.

Borah, of Idaho, Norris, of Nebraska, and Brookhart, of Iowa, all Republicans allied with the independent faction, entered the current controversy with expressions of dissatisfaction with existing enforcement agencies.

Borah, who as Pres. Hoover's most prominent campaigner on the prohibition issue, assured the entire personnel charged with making the Volstead act effective, and asserted that as now constituted it would never enforce the law.

Norris, who supported governor Smith in the presidential campaign, declared that efforts to suppress the alcohol traffic have never been made in good faith in numerous sections of the country. Enforcement officers, he said, have many times overlooked cases of men with political influence making fortunes through traffic in illicit liquor.

Brookhart came to the support of Senator Harris, of Georgia, in the latter's demand for the removal of Judge Paul J. McCormick, from President Hoover's law enforcement commission. Referring to McCormick's investigation that search of private homes without warrant was an outstanding evil of present enforcement activities, Brookhart expressed impatience "with making the government the criminal in enforcing the law and making heroes out of bootleggers."

Made Long Hike

Guelph, Ont.—Plodding through the snow-filled road from Guelph, Ontario, to a point seven miles below Arthur, Peter Peterson 80-year-old Arthur resident, has established a record for endurance. He had come to Guelph by train and returned to his home on foot although he had a return ticket in his pocket.

Start Egg-Laying Contest

Charlottetown, P.E.I.—The twelfth annual Prince Edward Island egg-laying contest has been started with an entry of 24 birds. Fifty-nine of the entries come from stock that had laid 200 eggs or more averaging 24 ounces to the dozen.

Alterations of Berlin's network of canals are being planned to make it possible for 1,000-ton vessels to pass directly through the city.

UNIFIED BORDER PATROL IS NOW PLANNED BY U.S.

Washington, D.C.—Plans for prohibition enforcement, which include a unified border patrol and limitation of the number of ports of entry from Canada to all parts of South America. Announcement to this effect was made by Hon. Peter J. Veniot, postmaster-general.

This letter rate already applies to all parts of North and Central America; and will now apply to the following countries: Argentine Republic, Bolivia, Brazil, Chile, Colombia, Ecuador, the Guianas, Paraguay, Peru and Venezuela.

Under-Secretary Mills, who made the announcement, said the plan for a unified border patrol would require the consent of Canada because it will provide for limitation on the number of ports of entry to this country. In addition the plan, he said, will provide for an extensive border patrol under direction of the coastguard to prevent smuggling.

At present, the Under-Secretary noted, a person coming from Canada must enter the United States anywhere along the border, but must report his entrance at the nearest port. This required, he said, a fast train or automobile or fifteen miles inside the border. Under the new plan if approved by congress and Canada, the patrol would work along the exact border and prevent entry anywhere except at points designated.

Ottawa.—The "teeth" would be taken out of the proposal mentioned from Washington for limitation of the number of ports of entry from Canada to the United States. The possibility that steps might be taken to refuse clearances for liquid shipments from Canada has been discounted from time to time.

No official information was obtainable, however, on the contents of the Washington despatch. Hon. W. D. Elder, Minister of National Revenue, is out of the capital and will not return for several days.

Mount Ishbel

High Peak In Rocky Mountains Named After Daughter Of British Labor Premier

Ottawa.—A peak in the Rockies 10,000 feet in height, has been named Mount Ishbel, to commemorate the recent visit to Canada which Miss Ishbel MacDonald made with her father, the Brit. Lab. premier. The peak is located 12 miles west of Banff, standing boldly from those visible from the Lake Louise District.

Announcement that Miss MacDonald's name had been perpetuated for all time in this manner, was made recently from the Department of the Interior.

Predicts Northern Railway

Line From Peace River To Great Slave Lake Certain, Says Colonel Cornwall

Edmonton, Alberta.—Construction of a railway line from Peace River to Great Slave Lake is predicted by Col. J. N. K. Cornwall, veteran northerner, who paid a flying visit to Edmonton on his way to spend the Christmas holidays in Victoria, B.C. "Northern development cannot be halted," he added. "The region is one of the richest in the world, and its development will really begin when adequate railway transportation is provided."

Rescue Is Effected

London, England.—Exchange Telegraph department issued a report of two whaling expeditions sent out by the Boyd Antarctic expedition had been rescued after their boats had been crushed in the ice. The news was received by the Byrd supply ship "Eleanor Bolling" by wireless. The "Eleanor Bolling" is now at Dunedin, New Zealand.

Made Long Hike

Guelph, Ont.—Plodding through the snow-filled road from Guelph, Ontario, to a point seven miles below Arthur, Peter Peterson 80-year-old Arthur resident, has established a record for endurance. He had come to Guelph by train and returned to his home on foot although he had a return ticket in his pocket.

Start Egg-Laying Contest

Charlottetown, P.E.I.—The twelfth annual Prince Edward Island egg-laying contest has been started with an entry of 24 birds. Fifty-nine of the entries come from stock that had laid 200 eggs or more averaging 24 ounces to the dozen.

Alterations of Berlin's network of canals are being planned to make it possible for 1,000-ton vessels to pass directly through the city.

A Baby Is Born An Old Timer Passes It Is Life!

So runs the local paper. Mr. and Mrs.____ welcomes a new child. Old Mr.____ who was one of the first white men here passes to his reward. A local couple joined in Holy Wedlock. These, and a hundred more little items of human interest are recorded by the local paper for neighbors to read. Not items of World Wide interest surely, not as important perhaps as a conference on Disarmanent, not as thrilling as a murder, but as interesting in the field that they cover as any of the above mentioned "High Lights" in the news of the world. Mrs.____'s birthday party, Mr.____'s presentation, Junior's school standing, the story of the local team's achievements in sport. All these are stories about people you know and associate with.

Two dollars a year---dear, perhaps, if you compare it with the big City Dailies or weeklies, cheap if you judge it by the amount of time and effort necessary and the limited field---indispensable if one is to be locally informed.

Quebec Winter Sports

Vive le Carnaval! Vive les sports d'hiver! In these few words may be summed up the spirit of Quebec in winter-time. Here for many years have gathered lovers of winter sports and frolics from all parts of the western hemisphere.

The northern capital of Canada is the American continent's metropolis for skiing, skating, snow-jumping, tobogganing, bob-sledding, skating, snow-shoeing, dog-team driving, curling, and horse racing. This year the city of Quebec has had a unique attraction to offer the visitor in February when the International Dog Sled Derby annually takes place.

Winter sports activities radiate from the Chateau Frontenac, Quebec's famous hotel, where Jack Stratheas will again be winter-sports director. This season he has a new attraction to offer during the carnival period, and that will be 23 girls members of the Toronto Skating Club will perform an ice-dance to be known as the "Danse Moderne." This will be a veritable "Ziegfeld production on ice."

In all about two hundred skaters will take part in this year's carnival. A record line of entries is promised for the Dog Sled Derby this season. Arthur Beauvais, driver of the Chateau team, announces that he will have a winter carnival every day. His dogs will be based at Cannonswagway, an Indian reservation near Montreal. At the Dog Derby, February 20, 21, and 22, the visitor will see such famous mushers as St. John, winner of last year's Derby; Sealsal, Norwegian hero of the epic dog race, Frank Dupuis, and many another well-known figure in action for three days over a 123 mile course, mushing 41 miles a day.

Other internationally famous skiing instructors will be on the staff of the Chateau Frontenac this winter. They are Irvind Nelson, Hans Gunnarsen, and Orrie Higgins. Revelstoke, British Columbia, skier, winner of last year's Derby, Maurice Burnside, and secretary of the Montreal Amateur Athletic Association, will be instructor at the Chateau's skating rink.

Escaping Winter at Victoria

Early in the new year, and following an eight-day Yuletide Festival at the Empress Hotel, the same...hostelry will be the scene under Canadian Pacific Railway auspices of a Sea Music Festival, January 15-18, at which British and Canadian sea chanteys will be featured. Among the more outstanding numbers will be "The Order of Good Cheer," incorporating old French sea songs of the period of Champlain; "Bound for the Rio Grande," an old song filled with many favorite sea chanteys; a folk play written by Ethel Basin, "At A Lewis Fisher's Cabin"; first-class choirs, some of them from the United States, others native, and excellent instrumental effects.

will all be in evidence under the musical direction of Harry Ernest Key. Lay-out shows scenes of "Bound for the Rio Grande," "Fishwives Dancers," and "The Order of Good Cheer." Following the sea music festival, there will be staged in February the Victoria mid-winter golf tournament at Colwood Park, with a special trophy presented by the Canadian Pacific Railway. The first presentation of the trophy was held in the presence of the railway, which was first held with such success last year and attracted a fine entry list. Victoria, whose grass is green and flowers bloom the year round, will thus again prove its title to be considered the Riviera of Canada with a mild climate making it a pleasant rest resort in winter.

WORLD HAPPENINGS BRIEFLY TOLD

Official France mourns Emile Loubet, former president who died recently at the age of 91.

Diplomatic relations between Great Britain and Russia formally resumed after a lapse of more than two and a half years.

The Canadian and United States delegations to the millennial celebration of the Icelandic parliament will sail from Montreal, June 15, aboard the S.S. Montcalm.

The Portuguese Government has authorized four mills to import 103,000 tons of foreign wheat before June 1, 1930. The action was taken because of the small Portuguese crop.

A movement to erect a monument to the late Lloyd Bennett as a token of Germany's gratitude for his heroism in attempting to rescue the Braemar trans-Atlantic fliers has been started.

The B.C. provincial government is distributing to the municipalities \$550,414 as their share of liquor profits for the six months ending September 30, and \$206,978 from permanent taxes.

Canada has registered with the League of Nations her agreement with the United States regarding the admission of civil aircraft; her agreement with Sweden exempting shipping from income tax, and the agreement between Canada, Cuba, the United States and Newfoundland relating to fisheries.

Despite rebates of \$250,000 within six months to users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of \$1,150,000 between April 1 and November 20, government officials state. At least \$50,000 more is expected to be taken in by March 31, 1930, the end of the fiscal year.

Canadian National Places Large Order

VIII Do Much To Relieve Unemployment Situation In Dominion

Orders have been placed by the Canadian National Railways for 120,000 gross tons of steel required for the construction programme of the National System during the coming year. It was stated officially at Canadian headquarters. Of this total, 30,000 gross tons have been ordered from the Dominion Iron and Steel Company, and 40,000 gross tons from the Algoma Steel Mills, at Sault Ste. Marie. In addition to steel orders, nearly 5,000 box cars have been ordered. On car orders placed, the Canadian Car and Foundry Company are to deliver 2,250 fifty-ton box cars, and 25 tank cars, each of 10,000 gallons capacity. The National Steel Car Company have received orders for 1,175 fifty-ton box cars, and the Aesthetic Car Company have been given orders for 200 refrigerator and approximately 1,000 box cars. The placing of box car orders has resulted in the manufacturers placing orders with the British Columbia Mills for some 15,000,000 feet of box car material. The placing of these orders has had an important bearing on the employment situation throughout the centres concerned. Inquiries are also being made by the Canadian National regarding locomotive manufacturers for the delivery of 18 Santa Fe type locomotives and 15 mountain type engin

To Prevent Seasickness

After 36 years at sea, during which time he served as surgeon on the "Aquitania," Dr. S. Diney Jones has retired. He has published a preventative for seasickness based on a study of this illness during his life on the ocean. Take no alcohol a week before sailing, eat sparingly, and avoid all acidic foods, is his advice.

Buck—"Can you give me a definition of an orator?"

Private—"Sure. He's the fellow who's always ready to lay down your life for his country."

Status Of Dominions

Conference Brings To Light Important Developments In Empire's Constitutional Position

Another important development in the Empire's constitutional position has resulted from the International Air Conference, just concluded at Paris. Britain and the Dominions, though they signed the 1919 international air convention separately, hitherto had one joint seat at the convention, despite sometimes conflicting interests. Now it has been unanimously agreed the Dominions have separate votes and the alteration is embodied in a protocol which the Dominions have signed in alphabetical order, along with other nations.

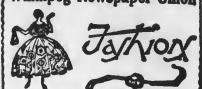

New Colored Film Process

Swiss Company Is Formed To Export New Invention

A Swiss company has been organized to exploit a colored film process invented by the French scientist, Berthon. The price will not exceed that of ordinary film, it is said.

The invention, although not explained to the public, is understood to render colors possible by optical instead of chemical means, the color being registered by bands on each side of the film, as in the case of sound in "talkies."

Winnipeg Newspaper Union

3140

(By Auneille Worthington)

A Princess suggestion in novelty silk crepe that you'll thoroughly enjoy caring for your daytime occasions.

It is in dark brown background printed in capacious tones, which gives a sportive air and makes it so appropriate for shopping, office or classroom.

The deep turn-back flaring cuffs are of the same dark lace fabric with fashionably frayed trim in bands of Galway. Black velvet ribbon may be used in place of the fur and is elegant.

The collarless sunburst necktie is finished with youthful self-fabric bow. It looks snug in the fit over fitted long-waisted bodice with pointed front.

The two-piece circular flaring skirt stitched to bodice, concentrates most fullness at front, so as to keep the silhouette slender with slim straight back.

Style No. 3140 is designed in sizes 16, 18, 20, 22, 24, 26 and 28 inches bust.

The making of this charming all-day dress practically means a two-piece skirt to be seamed and attached to the bodice.

Feather weight tweed, coat, canton crepe, flat silk crepe, crepe satin and plain and printed velvet suitable.

Pattern price 25 cents.

IMPORTANT WESTERN CANADA INDUSTRIAL PLANT

One of the Western Canadian industrial plants, the refinery of Imperial Oil, Limited, at Regina, Saskatchewan, which supplies gasoline and oils for Western Canada consumption.

Recipes For This Week

(By Betty Barclay)

CINNAMON APPLES SUPREME

1 package vanilla julep.
1 pint milk.
6 apples.
1 cup sugar.
½ cup water.
3 tablespoons red cinnamon can-

dies.

1 tablespoon lemon juice.

Pel and core apples and place in baking pan. Make syrup by boiling the sugar, water and cinnamon can-dies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, adding a little syrup. When cooled and the syrup has jelled, prepare vanilla julep according to directions on package and fill dishes. Let stand in a warm room until firm.

POTATO STUFFING FOR ROAST GOOSE

2 cups hot mashed potatoes.
1 teaspoon grated onion.
½ cup chopped walnut meats.
Paprika.
1 teaspoon salt.
¼ cup evaporated milk.
1 tablespoon butter.
Yolk 2 eggs.
1 teaspoon of poultry seasoning.
Mix the ingredients in the order given and handle as any stuffing.

A Good Gardener

Saskatchewan School Wins Silver Cup For Improvement To School Grounds

Michael Evaschken is the gardener. For three years a silver cup has been awarded by the Canadian Horticultural Council, of Saskatchewan, for greatest improvement in school grounds during the year. Each time a school taught by Evaschken has won the cup which was donated for the purpose by Prairie Nurseries, Limited.

Announcement of this year's winner was made at Saskatoon by A. R. Brown, director of rural education for Saskatchewan. The cup goes to Krasny school district No. 1121, 12 miles south of Sheba. Last year the cup was won by the Wishart school, north of Punnichy, and in 1927 by Janow school, 16 miles northeast of Prince Albert. Evaschken was the teacher at all three schools, having spent a year in each place.

He is a native of Manitoba, attended school at Dauphin, and took third class normal work in Manitoba. He took his second class at Saskatoon, and spent a year at the Agricultural College.

Cactus That Shoots

Dr. E. C. Leonard, Smithonian Institution, tells of a thorn-shooting cactus of Haiti. The sight jar to the bush will cause the cactus pads to shoot forth in a parabola several sharp thorns. These travel with considerable force, and can penetrate leather at a distance of six feet.

His Worry

A business man returned from the city to find the maid looking scared. "I'm sorry, sir," she said. "But madam had an accident in the car this afternoon, and it's been completely smashed. 'Good lord,' said the aghast husband, 'and my clubs were in the dickey.'"

The battle of Waterloo lasted only about eight hours.

Times Have Changed

People Too Used To Modern Improvements To Make Good Pioneers

It is almost invariably advanced in arguments regarding aid to immigrants that the latter have greatly deteriorated since the pioneer days of Canada when men and women invaded the wilderness with practically no resources and then hewed out homes and estates for themselves. Regardless of how the comparison may rebound to the credit of the first settlers, it is no help in solving the problem of colonization in Canada today. When this country was making its first bid for population the whole situation was parallel. Everybody was on the same footing. There were no millionaires, there was little luxury of any kind, no railways, no theatres, not even decent roads. The job ahead of the settler was to plunge into the wilderness and take the chance that others were talking. There were no doctors, no schools, no police, no government of ease or pleasure. The game was to eke out a existence under very difficult conditions, but equality was omnipresent. Today all the human beings that we can draw upon as colonists have seen something of comfortable existence, of motor cars, of railway trains, of luxurious homes, of fine hotels and theatres. They have witnessed the spectacle of a large percentage of other human beings go through life w/out engaging in grinding toil. It cannot be wondered that they shrink the onerous task of tackling existence at the bottom. The environment has made that look like a waste of time and effort. Everyone hopes, in some way, to beat out the primitive methods of gaining a livelihood.

Two months later it was observed that the little girl was grasping her eye along, and in great dread the doctor was sent for. In fact no medical aid was difficult to obtain. Hearing of the distress of the home a Red Cross Nurse hurried to see the child. The worse fears were realized. The child was evidently going blind.

There was one hope, that with immediate care the other eye could be saved, but there was a long and tedious and most costly journey to be made to the distant city of Edmonton, where eye specialists could be consulted.

Health officers of Red Cross in the capital city resulted in cooperation to the sufferer. The sight of one eye had gone, but with immediate care and treatment, the other eye could be saved. Twice blessed is the work of the Junior Red Cross in extending mercy to the suffering child.

Loganberries were produced by crossing raspberries and blackberries.

The Quality Of Mercy

Good Work Of Red Cross Society In Saving Eyesight Of Afflicted Child

In that far north land where the aeroplane is taking its mail today and linking the regions beyond with the centres of civilization, there lived a little child with a pair of beautiful bright eyes. Tragedy stalked in to the little girl one unhappy day, for she had the great misfortune to hurt herself with a pair of scissors while playing. Her eye was injured in a moment and in much pain the child had to endure the smarting ache. Anxiously her mother did what she could in first aid treatment, and to appearance the eye healed up.

There was one hope, that with immediate care the other eye could be saved, but there was a long and tedious and most costly journey to be made to the distant city of Edmonton, where eye specialists could be consulted.

Health officers of Red Cross in the capital city resulted in cooperation to the sufferer. The sight of one eye had gone, but with immediate care and treatment, the other eye could be saved. Twice blessed is the work of the Junior Red Cross in extending mercy to the suffering child.

George Washington never lived in the White House. This edifice was not yet completed when he died.

The food of oysters consists chiefly of microscopic plants which are carried to them by the currents.

Mid-Atlantic Airports Scheme

Artificial Islands Look Like Great Ironwork Piers

The idea of making a series of islands across the Atlantic as landing places for passenger-carrying aeroplanes that will one day ply the air between this continent and Europe has for long been the basis of romantic schemes. One such scheme is about to come true, and when it does, there will be eight floating islands between New York and Southampton, forming great stepping stones for the use of aircraft on regular scheduled flights.

These artificial islands are part of the equipment of a concern soon to exploit trans-Atlantic air service. The islands are known as landing aerodromes, after their inventor, who will begin this year. They will be anchored 400 miles apart, and will be landing ports for machines which expect to carry travellers from the United States to England or France in 15 hours.

Out of the water, the aerodromes look like great ironwork piers. But they will float instead of stand. Thirty-two "legs" will support the aerodromes, which will be 1,100 feet long, 400 feet wide and 350 feet high. The floating airports will be 80 feet above water, out of reach of the largest waves. The inventor says the peculiar construction will prevent all rolling pitching. A hotel will stand on one side of each island, and a harbor and mechanics' quarters on the other.

Killed By Chinese Bandits

Three Missionaries Are Slain In Most Revolting Manner

The Rev. James G. Kellet, superior of Maryknoll Junior seminary, at Los Altos, Calif., told the Associated Press that he had received by mail details of the murder, in China, recently, of three Franciscan missionaries, Bishop Jane and Fathers Bruno and Rupert.

Father Keller said the missionaries were killed in a most revolting manner. Bishop Jane was literally hacked to pieces. The clergymen were captured by bandits. The death of these missionaries, Father Keller said, brings the total number of Catholic priests killed in China recently, to 22.

World's Largest Market

Smithfield Market, in London, England, said to be the largest meat market in the world, is shortly to celebrate its sixty-first anniversary. Some idea of its capacity can be had in the fact that 4,000 tons of beef, the equivalent of 60,000 sides, can be displayed at one time. More than 180 firms are contained in the building. In December, 1928, more than 20,000 tons of beef were handled there.

George Washington never lived in the White House. This edifice was not yet completed when he died.

The food of oysters consists chiefly of microscopic plants which are carried to them by the currents.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent sunlight. It makes light through windows for cattle sheds, dairy barns, poultry houses, barns and outbuildings. It is exceptionally unbreakable, flexible and is easy to clean.

It is now being successfully used for sunrooms, verandas, schools, factories, sanitariums, hot beds, plant, covered areas and greenhouses. It keeps out cold and heat and is equal to glass with an average thickness of 36 inches only. A roll of WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of ordinary window glass weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Foot, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS

YOUR CHICKENS

YOUR CATTLE

Break in 100% Sunlight

Send for booklet "WINDOLITE"

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic, all in one.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the power of sterilization, the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital rays from our body. Therefore, the invention of WINDOLITE has completely met the long-felt want. Exhaustive experiments have conclusively proved that it is a most efficient substitute for glass, that it freely admits the Ultra-Violet rays, which in use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to agriculture, increasing the egg-laying capacity and fertility of chickens, which has greatly improved the health of cattle and is now being used in domestic and household requirements.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blacke Joe's New York night club, is loved by Grace Farrel, the cigarette girl, but she doesn't know it. Her friend, Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Juniper, is about two years old, Molly elopes with John Perry. Al, who loves her, follows. Al and Perry take the child Al adores, and sail for France. Al, broken by the loss, becomes a derrick. Months later he returns to Blacke Joe's, where he is saved by Grace Farrel, who makes him promise to stage a comeback. Al falls in love with Grace, and, while Grace is happy in his love, she often wonders what has become of Molly, and is worried.

CHAPTER XXVIII

Grace realized that on many occasions when Al was silent he was thinking of his beloved son and wondering how Juniper was faring. It was just about a year now since Molly had so cruelly taken him from Al and rushed off to Europe with John Perry. No word had reached New York concerning the elopers since that one message announcing that Molly was suing for divorce. It's strange silence in itself was ominous to Grace. She knew Al's life was inexplicably bound up in Juniper's and because that Molly had a hold on him.

Perhaps Al sensed this feeling of instability in Grace. At any rate, he broached the subject near to her heart.

"Grace, you and I are going to be married one of these days!"

It was a question, not an assertion, and Grace looked at him with gently interrogating eyes, saying nothing.

"Will you marry me, Grace?"

"Al, you know how I feel. You know I love you—of course I want to marry you."

"But what?"

"You don't even know if you're divorced or not."

"I'm finding that out—the lawyers are working on it now. I would have brought it up before, but I wanted to

be well on the way to recovery before I mentioned it to you."

"But what about Juniper?"

A faint shadow crossed Al's face, then he drove it away. "He had reason that out, too.

"I can't have Junior, anyway," he said. "Molly would never give him up. And I do want you, Grace. I want you so much. I love you dearly, I never stop loving you for a single moment. I think you're the most adorable and fascinating and beautiful person on earth."

Grace stepped closer and looked up into his eyes. "And I feel the same about you, Al," she said simply and sincerely.

Meanwhile, what was happening to Molly in Paris?

During the first few months in the French capital and in the brilliant resorts along the Riviera she had been delightfully happy with John Perry. And she loved having Junior with her, too.

But Perry did not like Juniper; the child was not his own and he often felt that the little boy was between him and Molly. Molly did not notice this at first, she only sound increasing joy in the presence of the dark, handsome Perry. Never for a moment did she regret leaving Al and giving up the fame he had brought her to Broadway. She abandoned herself completely to her admiration of Perry, waiting impatiently for her divorce to be granted. This complete subversion of her character to the whims and demands of Perry astonished even Molly herself. Never had she believed it possible for her to forget herself so completely in thoughts of another person.

The couple travelled from one resort to another, spending money lavishly, but always circumspectly because the divorce had not yet been granted. When they gambled at Deauville or Monte Carlo it was Molly's money that was used, for it turned out that John Perry did not have so much after all. He had earned the reputation of having a fortune simply because of his lavish spending on Broadway.

But during this period the relationship between Molly and John changed perceptibly. It was John who began to show signs of boredom and Molly who became more infatuated. One day when she was moody he did not forgive her as Al had always done. He simply went away and stayed a few days. When he returned in response to her begging letters she loved him more than ever.

Then came the day when Perry said, "Molly, I wish you wouldn't have that child around so much. He interferes with our plans and he bothers me terribly."

Molly's voice trembled as she answered. "But I love him, John? What can I do with him?"

"Send him away," insisted Perry harshly. "Send him to a nursing home, or board him out with some family."

Molly gazed long into the handsomely irritated features of the man she loved. She realized she must do as he said if she would hold him. So little John was boarded out with a French family. It happened to be a family where he was given good care, so his usually noisy cheeks became thin and pale. He was terribly lonely, and he often cried for his mother, his mother who only came to see him once a week now. Vaguely he remembered his daddy back in America, the daddy who had loved him so.

One day Molly realized that her money was dwindling with dangerous rapidity. John Perry asked almost daily for loans, which he wasted in gambling, and never suggested paying back. Molly was afraid to call him to account, afraid even to stop giving him money. With a deadly pain in her heart she sensed that she was on the verge of losing him. If she said a word he might up and leave her at a moment's notice, but if she kept silent he would probably marry her. And the divorce was due any day now.

Shrewd John Perry played pitifully on Molly's infatuation for him, as pitifully as she had once used Al's love to become more uncertain with each further her ambitions. His tempering day and his demands for large sums of money more insistent.

Then came the day when Molly received news of the divorce. She was wild with happiness as she flung her arms about John Perry's neck.

"Now, John, you can be married!

I'm not worried about that."

Perry put his hands lightly on her shoulders and looked down into her eyes with a quizzical expression. A show-down was at hand.

"Wonderful!" he said deliberately. "Well... maybe. And maybe not."

"What do you mean, John? I don't want to marry me?"

"No; I don't think I do," he answered calmly.

Molly drew back. First her expression was beseething, then came anger.

"After all I've done for you — to throw me down!"

TRY IT THE PLEASANT WAY

Perry merely shrugged his shoulders in answer.

Then fury broke loose in Molly. "You cheating dog!!" She backed away from him, picked up a vase from a table, and sent it straight toward his head. Perry dodged deftly, smilling as the base smashed in fragments against the wall. With a nonchalant air he picked up his hat and stuck.

"Where are you going?" cried Molly. "I'm leaving. You'll never see me again."

Molly cried all that night. Next morning she awoke to find a telegram telling her Junior was dangerously ill:

Back in New York Al had returned to fame and Broadway in a Marcus review. All over the city you could see the flaming billboards announcing his presence—"Al Stone, Broadway's Famous Singing Fool"—as the headliner in the Marcus Review for 1928. When you walked down Broadway at night you saw his name in yellow lights against the inky sky. His come-back was a complete success.

One night, as the stage doorkeeper at the Algonquin Theatre, where Al was appearing, sat smoking the stub of a cigar, a tidy and expensive little sport car drove into the alley by the stage entrance. Al was at the wheel of it. He stopped beside him sat Grace Farrel. The doorman heard their happy chatter as Al parked his car. The young singer was feeling much better, for the news had just reached him from Paris of Molly's divorce. That meant that he and Grace would soon be married.

(To Be Continued.)

Trust Fund For Soldiers

People Will Be Glad To Support Such A Worthy Institution

Why not start a nation-wide trust fund that shall be invested and administered for the benefit of those soldiers who gave so much, and who are receiving so little, and that little sometimes only after the unwinding of endless red tape? One dollar from every resident of Canada would create a fund that would be a most practical expression of our obligation. Almost any person could and would pay one dollar if they thought that the problem of caring for disabled soldiers could be carried out in a proper manner. Many would pay thousands. For the investment and administration of such a fund the best minds of the country would be available. It would be well to serve on such a Board of Administration, and men of keen business ability could bring to bear upon this problem the same good sense that they show in conducting their own bus'ness. The principle here suggested of creating a trust fund for our soldiers has already been adopted in connection with the Canadian Legion, but that fund is too small to meet the needs.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

What He Required

The tramp knocked hopefully at the door of the cottage.

"Please, m'm," he said to the lady who opened it. "I'm a sick man. The doctor gave me this medicine, but I ain't got nothing to take it with."

A sympathetic light came into her eyes.

"It will relieve a Cold—Colds are the commonest ailments of mankind and if neglected may lead to serious complications. Cooling, caressing—it softens and disperses all roughness or smarting, and gives a smooth, delicate, fragrant, it adds exquisite charm to the most finished appearance. Daily women inevitably choose Minard's. A very smooth lotion, it makes the skin rose-soft in texture. Recommended also to soften and whiten the hands. Truly a great extent controlled by the secretions of the ductless glands. Ideas or impressions can definitely affect their action."

Woman Has Shivered

For Fourteen Years

Another Milestone in Arctic Circle and Has Not Been Warm Since

The coldest man in London is an omnibus conductor who claims that he has not been warm in 14 years. He told a reporter:

"I was torpedoed on August 8, 1915, in the Arctic Circle, and I've never stopped shivering since. I was serving in the auxiliary cruiser 'India,' and was four hours on a raft. I still dream of gasping for breath as the seas swept over us."

"Another man and I were interned in Norway, in a desolate spot, and we used to dress to go to bed."

Medical Correspondent writes:

"It is quite feasible that a mental shock should make a man cold for life. Warmth depends mainly on blood circulation, and pressure which are to a great extent controlled by the secretions of the ductless glands. Ideas or impressions can definitely affect their action."

A Flood Of Testimonials

Perhaps the reason Commander Byrd is coming in for some criticism from other explorers is because of the flood of testimonials as to the merits of this and that used by his expedition. These testimonials presumably paid for by the recipients.

Exploration becomes a little too commercial, perhaps, in such circumstances. But everybody is endorsing something or other nowadays.

Lady To Doctor—"I'm bothered with a little wart I'd like to get rid of."

Doctor—"You're in the wrong office, lady, the divorce lawyer is next door."

Minard's Wards Off Grippe.

Naturally Feved.

Magistrate—"Now tell me, what started the trouble?"

Witness—"I asked him quite per-

sonally who was going to be buried, and he answered sarcastically like: 'I dunno; I s'pose it's the gentleman in the hearse.'"

Mrs. Richleigh: Rembrandts are scarce, you know.

Mrs. Goldman: Yes, only the other day I noticed there are only four in the telephone directory.

There is one thing, and only one, left that cannot be jazzed — the village church bell.

What's In a Name

Evidently a Lot According To Captain Of Sailing Ships

It is a legend of the sea that you may do what you like with a steamship; change her name, alter her so that her own builder would not know her—but you must not do this with a sailing ship, for she has a soul.

This is the tragedy of the man who did, and of the fate that befell his fleet of windjamners.

The war had not ended long before Sir William Garthwaite, owner of the Garth Line, a man with a love of his blood, bought himself that so long as there were oceans there would be room for the sailing ship.

So he bought up six of the newest windjammers, with wonderful records of service in the Cape Horn trade, but re-named them all and today not one of them exists.

The last of the line, the four-masted barque "Garthpool," was wrecked a short time ago off the west coast of Africa.

"Her end was what I would have wished," said Sir William Garthwaite, "she went down with all our colors on a voyage—not sold to a foreigner or handed over to the slave traders."

"Garthpool, Garthwaite, Garthgarry . . . one of them I have gone. One struck an iceberg, another was wrecked on an island, a third was damaged and battered to a hull in a typhoon; yet another had to be abandoned after a cruel buffering by mountainous seas."

"It is true that I rechristened them, gave them all the prefix 'Garth,'" for I loved them. A sailing ship has a soul, a beauty all her own. The captain of the 'Mauretania' told me once he could always tell a man trained in sail.

"And now they have gone for the Garthpool was not only the last of her type, but the last deep sea windjammer in British ownership."

Prehistoric Indian Fortification

Another Historic Saved To Be Preserved For Nation

The Southwood Earthwork, an old Indian stronghold near St. Thomas, Ont., famous among archeologists as the only prehistoric Indian double-walled fortification of which remains have been found, has been saved from oblivion by the intervention of the historic sites division of the National Parks Branch.

The old fort, the walls of which have crumbled so that they are now not more than three feet high, is thought to have been one spot at which the people of the Neutral Nation made their last desperate stand against the war-like advances of the Iroquois who finally drove them from Ontario about 250 years ago.

The site itself covers an area of about three acres. The fort was protected by a double line of earthworks which completely enclosed it. The "moat" between the two walls was about 30 feet in width. It is thought likely that a platform of high sharpened logs set vertically formed the superstructure atop the earthwork.

The site itself covers an area of about three acres. The fort was protected by a double line of earthworks which completely enclosed it. The "moat" between the two walls was about 30 feet in width. It is thought likely that a platform of high sharpened logs set vertically formed the superstructure atop the earthwork.

The site itself covers an area of about three acres. The fort was protected by a double line of earthworks which completely enclosed it. The "moat" between the two walls was about 30 feet in width. NOTES AND COMMENTS

The Journal appears this week in abbreviated form. Business conditions make it necessary. Expenditure must be kept within the revenue of a newspaper the same as in all other lines of business, hence the necessity for this issue being half its usual size. We assure our readers this is only a temporary measure; we hope for only this week.

A newspaper is a reflex of the community in which it is published; if business and social activity is not brisk, it is immediately reflected in the news and advertising columns. Even at the best of times the margin of profit in publishing a weekly newspaper would not enable one to live in a state of affluence. But there is some satisfaction apart from monetary considerations if a newspaper can be of some service to the community in which it is published. The dailies of course give up-to-date current news, but the weekly is the medium which is relied on to keep neighbours in close touch with each other, for merchants to advertise their wares, and to develop a closer bond of fellowship within the community. It is looked to to boost all local activities, and to encourage all movements that create interest and activity and progress.

After all, most people feel that something vital is lacking if a community has not the enterprise to create sufficient business to enable a newspaper to be published. The temporary lull in general business conditions which are not confined to this district it is anticipated will soon be replaced by a period of brisk activity in all lines.

Natural gas is being wasted in enormous quantities in Turner Valley, causing a great deal of concern. Its wastage figured in tons of coal would run into possibly 25,000 tons per day. Nobody appears to have a remedy to offer. One thing is certain. Oil cannot be taken from the earth indefinitely, any more than can coal or minerals. Despite the fact that coal has very serious competition in oil and gas, yet indications are that through research work it will be found that coal can be used in such a manner that it will prove the most economical of fuels. Experimental work with pulverized fuel on steamships has proved its economy over fuel oil, and it is being tried with satisfactory results in large buildings in various parts of the Dominion.

The coal industry in the past has not given much attention to research work to make its use more efficient. Oil and gas have replaced coal to some extent. Governmental work has been carried on to prove the value of coal as compared with other fuels, yet the coal industry has been absorbed in competition to supply a market for which there is already over-production.

Another phase of the problem for the industry in Alberta is that while the west is clamoring for a subsidized freight rate to ship coal to Ontario, the government and people of Manitoba continue to use more American coal than that of Alberta. This was forcibly emphasized recently when Premier Bracken of Manitoba protested to Alberta government against asking for tenders for Indiana stone when it has large deposits of Tyndall stone. His protest immediately created a controversy asking why his government is not using Alberta coal in their public buildings.

It brings home the necessity of developing our home industries if we are to prosper and furnish employment to our own people. Boil it down to even in our local communities, if we send money away to purchase that which we can purchase on as favorable terms in our own bailiwick, it is bound to cause a loss of work and retard the development of a community. We must develop business within our own borders if we are to progress. And kindly take note that this applies to the industry in which this newspaper is vitally interested—the production of printing. The more printed matter we produce, the more money we receive to expend in local channels of trade, for 100 per cent of the profits earned is re-distributed into local trade channels.

With a provincial election in the offing, it is time for local political leaders to be sizing up the possibilities of candidates, their ability and fitness to represent this constituency. The Labor vote predominates, quite naturally in a district such as this, but the time has passed when Labor can afford to be led by extremists, as the steady development of the Labor party in Great Britain has forcibly demonstrated. Labor and capital are indispensable to each other. The mines of this district in the first place required capital to develop them to their present productive capacity, while labor in turn supplied the energy which enables capital to earn the dividend to which it is entitled. Harmony between the forces of capital and labor can be obtained only by team work and compromise.

The need for outlining more progressive policies and improving business in various details will be discovered if a truthful inventory is taken by every business man at the end of the year.
